EXPERIENCE

Software Developer | *Promptli (Voice AI for Service Businesses)* 2026 – Present
LiveKit, OpenAI Realtime, Twilio SIP, Convex, Cal.com, AWS Lightsail, Docker | promptli.com

- Built end-to-end voice-AI receptionist on **LiveKit Agents** (TypeScript) using **OpenAI Realtime API** for low-latency speech-to-speech, handling inbound + outbound PSTN calls via Twilio SIP trunks.
- Engineered **14 LLM function-calling tools** (availability lookup, booking, cancel/reschedule, RAG knowledge search, customer history, live employee escalation, hang-up) wired into self-hosted Cal.com for autonomous 24/7 appointment management.
- Shipped **4 outbound agent modes** (receptionist, post-service feedback, review collection, promotional updates) with per-tenant prompt templates and dynamic call metadata; pre-hydrates customer context to cut tool-call latency.
- Architected real-time data layer on **Convex** (21-table schema, vector search for RAG, serverless actions) powering call transcripts, knowledge review queues, and live escalation routing.
- Automated per-tenant infra: cloud-init bootstrapped **AWS Lightsail** VMs running Docker Compose stacks (Cal.com + plugin), isolating each business's data and SIP routing.

Software Developer Intern | *Artly Creative Labs* Jan 2026 – Present
React, TypeScript, Remotion, AWS Lambda, Convex, React Native (Expo)

- Building **ReelCat**, a full-stack video editing SaaS with timeline editing, text overlays, and real-time preview.
- Architected serverless video rendering pipeline using **Remotion + AWS Lambda**, reducing render time by **60%** vs client-side.
- Integrated auth, payments (Dodo), analytics (PostHog), and real-time sync (Convex) into a unified platform.
- Developing cross-platform mobile app with **React Native (Expo)** targeting iOS and Android.

Lead Full-Stack Developer | *E-Summit '26, IIITDM Kancheepuram* Jan 2026 – Feb 2026
Next.js, TypeScript, PostgreSQL, Supabase, Redis, Vercel | github.com/YashvanthSankar/esummit26

- Solely architected the official E-Summit '26 platform (**194 commits**); served **12,000+ page views** and **1,000+ concurrent users** with zero downtime.
- Engineered QR-based ticket verification with **Redis caching** achieving **sub-100ms** scan times for **1,000+ attendees**.
- Built admin dashboard with real-time revenue analytics, bulk CSV exports, and Row Level Security; implemented Google OAuth and PWA support.

PROJECTS

ReFile – AI-Powered Media Processing SaaS *Next.js, FastAPI, LangChain, Whisper AI*

- Built full-stack SaaS that generates Linux commands for video, audio, image, and PDF processing via natural language.
- Integrated **LangChain + LangGraph + Mistral AI** pipeline with per-user conversational memory; voice transcription in **10+ Indian languages**.

Scan2Save – Smart Retail Platform | **Won 2nd Place** at VOID:V1 (**3,000+** participants) *Next.js, Prisma, PostgreSQL, Groq*

- Built PWA with QR store entry, AI-personalized offers via **Groq LLM**, and scan-and-go checkout with UPI payments and Firebase OTP auth.

Preploot – Gamified Learning Platform *Next.js, PostgreSQL, Prisma, LangChain, GenAI*

- Engineered platform with adaptive AI-generated quizzes and personalized study paths via LangChain + Google GenAI (JEE, NEET, GATE, UPSC).
